```
1
2 def rotate_string_left(s, k)
3   length = s.length
4   k = k % length if length > 0
5   rotated_array = Array.new(length)
6   (0...length).each do |index|
7     new_index = (index - k + length) % length
8     rotated_array[new_index] = s[index]
9   end
10  rotated_string = rotated_array.join
11
12  rotated_string
13 end
14 original_string = "abcdef"
15 k = 2
16 result = rotate_string_left(original_string, k)
17 puts result
18
```

STDIN  
Input for the program (Optional)

Output:  
cdefab
